

Learn languages **your way.**

BeeSpoke

Our Mission

We want to empower a new generation of language learners to connect across cultures by sharing their passions.

We provide an interest-based, customizable learning experience that makes language learning personal, engaging, and meaningful.

The Problem

Mainstream apps don't teach language that people can use in their day-to-day activities.

The Solution

Allow people to choose the topics they want to learn about, so that they can apply their skills immediately in their daily life, whether it's for work, school, or leisure.

Market & Revenue Model

Language learning is in high demand, with apps like Duolingo nearly tripling their MAU over 4 years to reach 113 million.

To jumpstart market share, we're offering a freemium model. Ads are surfaced in free lessons, or users may purchase an ad-free subscription with extra features like AI conversation practice.

Funding Goals

\$1,000,000 for 1 year
will allow us to get:

- Tech Team
- Language SMEs
- Design + Marketing

Social Good

As part of our mission to create meaningful language courses, we are partnering with endangered language communities to help with revitalization efforts.

Our first use case is Houma, a Native American language originally spoken in Southeast Louisiana.
